Make Sure Your Reflective Product is RIMA-I Verified

The Reflective Insulation Manufacturers Association International's (RIMA-I) voluntary **Product Verification Program** allows member manufacturers the opportunity to take their product/business to the next level by having their products verified through the association using a third-party accredited laboratory. The association launched this **Product Verification Program** because so many business professionals and consumers wanted to know if the products they are purchasing were properly tested and would perform as expected. This program does the legwork for you.

RIMA-I's **Product Verification Program** identifies reflective products that have fulfilled test requirements in accordance with the current applicable ASTM standards. Products will be classified in one of five categories: reflective insulation, radiant barrier-vapor transmitting, interior radiation control coating (IRCC), facer materials or radiant barrier – vapor barrier. RIMA-I utilizes an independent, accredited testing and inspection laboratory that will determine if the product's physical properties comply with the appropriate standards. Technical data sheets, ASTM-compliant testing documents as well as websites containing performance data will be cross-checked for accuracy. Once all products within a category have been approved, each product will be assigned a unique verification code which the company can then use on their product, website, company literature, and other marketing materials.

To ensure your reflective product is properly tested and meets or exceeds testing requirements and standards, make sure you use a RIMA-I Verified Product. For more information and to see a list of verified products, go to <https://www.rimainternational.org/verify/>.

(The Reflective Insulation Manufacturer's Association International is a group of dedicated people working together to propagate the knowledge and use of reflective insulations and radiant barriers. RIMA-I has been the major force in establishing fair ASTM standards for testing and installation procedures. RIMA-I welcomes all who are interested in promoting and directing the growth of the industry. For more information about membership or the industry, please contact Executive Director Mary Edmondson at 800/279-4123 or visit us on our website at www.rimainternational.org.)
